INTERNSHIP CONFIRMATION LETTER

I. INTERNSHIP UNIT INFORMATION

COMPANY: ASO Mechatronics Joint Stock Company

Website: www.aso.vn & www.aso.com.vn

Email: info@aso.com.vn

Hotline: (+84) 0912 172 023

Address: Km15, National Highway 3, Tan Thanh 2 Area, Bach Quang Ward, Song Cong City, Thai Nguyen Province, Vietnam.

Supervisor information:

First and last name: Thanh Hai Pham

Position: Project Management Office

Phone number: +84 375398686

II. INTERN INFORMATION

Full name: Pham Tri Thanh

School: HUS High School for Gifted Students Grade: 12A1

Internship period: From June 3rd 2026 to July 28th 2026

Position: Intern at Mechatronics Department

INTERNSHIP EVALUATION

		Excellent	Above Average	Average	Below Average	Unsatis factory	Not Applicable
1	Punctuality	✓					
2	Professionalism	✓					
3	Effectively performed assignments	✓					
4	Communication skills		✓				
5	Writing skills	✓					
6	Computer skills	✓					
7	Ability to work efficiently in a team	✓					
8	Adaptability		✓				
9	Decision-making, setting priorities	✓					
10	Reliability	✓					
11	Attention to accuracy and detail	✓					

12	Willingness to learn	✓					
13	Quality of work	✓					
14	Critical thinking and problems solving skills		✓				
15	Meeting deadlines	✓					
16	Interest and Enthusiasm	✓					

Supervisor's remark:

Thanh participated in an observational internship within the Project Management Office, where he was introduced to engineering design processes, CAD-based modeling, structural considerations, and industrial product development. Throughout the program, he demonstrated excellent analytical thinking, asked insightful technical questions, and showed a strong willingness to learn from practicing engineers.

Particularly noteworthy was his interest in applying electrical and mechanical design principles to solar systems and electrostatic precipitator. During discussions regarding his project, he demonstrated an understanding of engineering problem-solving and actively sought feedback on structural design, motion mechanisms, automotive remote and practical implementation considerations. His ability to integrate knowledge from multiple disciplines reflects qualities commonly observed in aspiring engineers.

Based on his performance, I believe Thanh possesses strong potential to pursue further studies in Mechatronics Engineering and related technical fields.

Thai Nguyen, July 28, 2026
